## DETAILED ACTION

***This is a supplemental Election/Restriction, with a corrected response date of 1 month.***

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I.

Claims 1-3,8-27,29,32,35,38,41,44,47,50,53,56,59,62,65, drawn to the motor structure of the stator and rotor with magnets, classified in class 310, subclass 46.

Group II.

Claims 4,5,6,7,30,33,34,36,37,39,40,42,43,45,46,48,49,51,52,54,55,57,58,60,61,63,64,66,67, drawn to a transportation system having a dynamoelectric machine of a rolling stock system, classified in class 105, subclass 49.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed

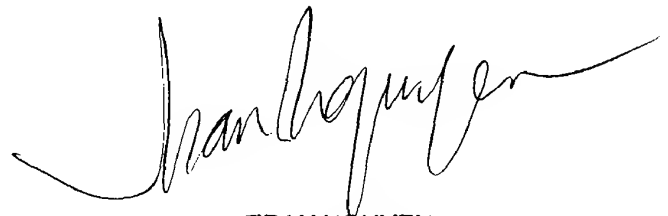

does not require the particulars of the subcombination as claimed because The motor structure of the stator and rotor with magnets does not necessarily need to be utilized in a rolling stock system, the motor can be utilized in a automobile vehicle, an aircraft, watercraft vehicles, generators, and any type of electrical-mechanical machinery such as a drill, etc. The subcombination has separate utility such as having a power converter and a current collector, which is not required with all motors.
